Live equity curve from January 2024

02 Jan 2024 · 29 Oct 2026 · 2,342 trades · 2.8 years · base capital $500,000

NOTICE

Performance expressed on one standard futures contract per market traded. Percentage figures use a $500,000 fixed notional capital (arithmetic cumulative %, no compounding). In % view, DBMF and S&P 500 (SPY) are scaled to match Tirmann realized volatility for an indicative like-for-like risk comparison. This scaling is not a standardized or tradeable allocation. Absolute results remain available in USD. Past performance is not indicative of future results.
